Configuración Correo Pegasus

1. Para configurar una cuenta de correo por primera vez en **Pegasus Mail**, presione **Next** en la pantalla **Pegasus Mail Internet Setup Wizard.**

🙀 Pegasus Mail		- 🗆 ×
Ele Edi & Pegasus Contraction of the Contraction o	Mail Internet Setup Wizard	<u> </u>
Open	Pegasus Mail is now going to ask you some simple questions that will allow it to send and receive Internet mail for you. If you do not know the answers to these questions, ask your service provider or network administrator - he or she should be able to provide them. If you do not wish to continue configuring Pegasus Mail to access your Internet mail, simply press Cancel at any time, and when you are ready to proceed with the configuration, select "Network, configuration" from the program's "File" menu. Please click the "Next" button to move to the first question.	
	Cancel Next>	
Press <f1> for help</f1>	Single-user mode 0 new	

2. En la siguiente ventana escriba su dirección de correo electrónico en el recuadro correspondiente. Luego haga clic en **Next.**

Pegasus Ma	ail Internet Setup Wizard	×
	Your electronic mail address Please type in your electronic mail address below. Your electronic mail address should look something like "sally@riverboat.org" - namely, a username followed by an '@' symbol and an Internet domain name.	
	usuario@datamarkets.com.ar	
	* Click "Next" when you have entered your address * Click "Back" to return to the last screen * Click "Cancel" to stop the configuration process for now.	
	Cancel < <u>B</u> ack Next >]

3. Escriba **pop3.datamarkets.com.ar** en el espacio correspondiente al Incoming Mail server. Al terminar presione el botón **Next.**

jasus Ma	il Internet Setup Wizard
	The address of your POP3 server Please type in the name of the machine that acts as your POP3 server below. This address usually will not contain an '@' symbol. A "POP3 server" is Internet jargon for a machine where your incoming mail is stored until you ask for it.
	pop3.datamarkets.com.ar
	* Click "Next" when you have entered your POP3 server address * Click "Back" to return to the last screen * Click "Cancel" to stop the configuration process for now.
	Cancel < Back Next>

4. Complete la siguiente pantalla con su nombre de usuario y contraseña. Al finalizar haga clic en **Next.**

Pegasus Ma	ail Internet Setup Wizard	×
FBA	Your username and password	
	Your "username" identifies whose mail you want to get from the POP3 server, and your "password" proves that you really are who you say you are. Either may be case-sensitive, so "bob" and "BOB" may be regarded as different - be careful to type them in accurately.	
	User name: usuario	
	Password:	
	* Click "Next" when you have entered your username and password * Click "Back" to return to the last screen * Click "Cancel" to stop the configuration process for now.	
	Canad (Pack Neut)	
	Cancel < <u>B</u> ack <u>N</u> ext >	

5. En la siguiente ventana escriba **smtp.datamarkets.com.ar** en el espacio correspondiente al **SMTP server.** Luego presione **Next.**

jasus M	ail Internet Setup Wizard
N	The address of your SMTP server
	Please type in the name of the machine that acts as your SMTP server below. This address usually will not contain an '@' symbol. An "SMTP server" is Internet jargon for a machine that can send your messages to their final Internet destinations for you. You can often enter your POP3 server here, but ask your network manager or ISP if you are unsure.
	smtp.datamarkets.com.ar
	* Click "Next" when you have entered your SMTP server address
	* Click "Back" to return to the last screen * Click "Cancel" to stop the configuration process for now.

6. Seleccione la forma de acceso a Internet. Si Ud. está conectado desde un CableMódem seleccione Network; si se conecta por medio de un servicio de acceso telefónico marque la opción Dialup. Al terminar haga clic en Next.

X	How do you connect to the Internet? Pegasus Mail can tune itself to suit different ways of accessing the Internet, If you use a modem connected to your computer to dial in to
	a Service Provider, click "Dialup" below. If your computer is connected to a network that has permanent Internet access, click "Network" below.
	C Dialup C Network
	* Click "Next" when you have selected your access method * Click "Back" to return to the last screen * Click "Cancel" to stop the configuration process for now.
	Cancel < <u>B</u> ack <u>N</u> ext >

7. En la siguiente ventana presione el botón Finalizar para terminar la configuración.

120	Pegasus Mail now has all the information it needs in order to perform basic Internet mail services for you.
٢	You can change the information you have entered at any time by selecting "Network configuration" from the "File" menu. Many other more specialised aspects of handling your Internet mail can also be changed in the same place.
	* Click "Finish" to save the information and close this window * Click "Back" to return to the last screen
	* Click "Cancel" to stop the configuration process for now.

- 8. Si Ud. ya posee una cuenta de correo y desea configurar una nueva dirección, realice los siguientes pasos: Dentro del programa Pegasus Mail, presione el botón **Tools (Herramientas)** y en el menú
 - desplegable seleccione Internet Options (Opciones de internet).
